MS-ISAC Members Can Now Access Deloitte's Cyber Detect and Respond Portal to Proactively Prepare for, Identify and Respond to Cyber Threats

First-of-its-kind offering gives thousands of cybersecurity officials in all 50 states free access to up-to-date cyber threat intelligence

WASHINGTON, June 10, 2021 — [Deloitte](#) and the [Multi-State Information Sharing and Analysis Center \(MS-ISAC\)](#), a component of the Center for Internet Security, Inc. (CIS®), have agreed to a first-of-its-kind offering that will provide thousands of government professionals throughout the U.S. with free access to Deloitte's [Cyber Detect and Respond Portal](#), a secure online platform that provides industry-leading cyber threat intelligence.

“Combatting cyber threats to U.S. State, Local, Tribal, and Territorial governments demands timely threat intelligence, as well as robust, cross-industry information-sharing,” said [Srini Subramanian, Deloitte Risk & Financial Advisory](#) leader for the state and local government, higher education advisory sector, and principal, Deloitte & Touche LLP. “We are offering Deloitte's Cyber Detect and Respond Portal to MS-ISAC members to help under-resourced teams focus on critical cyber threat activity and encourage more information sharing about vulnerabilities so government agencies can be better informed and prepared for those threats.”

Beginning today, MS-ISAC members can leverage information from Deloitte's Cyber Detect and Respond Portal, which provides in-depth information, analysis and recommendations from Deloitte's worldwide network of cyber threat analysts with threat reports mapped to known tactics, techniques, and procedures of cyber threat actors and malware campaigns. Through Deloitte's portal, MS-ISAC members can access reports and notifications on relevant cyber threat activities and vulnerabilities specific to a particular threat actor group, malware campaign, system, and sector. By augmenting these reports with the cyber threat bulletins from the U.S. Department of Homeland Security, MS-ISAC members have access to both government and private sector perspectives on cyber threats.

“MS-ISAC works to help improve the overall cybersecurity posture of U.S. State, Local, Tribal, and Territorial governments through focused cyber threat prevention, protection, response, and recovery,” said Mike Aliperti, chair of MS-ISAC. “Adding Deloitte's Cyber Detect and Respond Portal to our member services portfolio will provide our more than 10,000 members nationwide with enhanced capability to identify and understand the potential cyber threats they encounter when providing essential citizen services.”

Created in 2004, MS-ISAC enrollment recently surpassed 10,000 members — a milestone for state, local, tribal, and territorial government agencies across the country. This collaboration with Deloitte further strengthens their efforts to share cyber-related information and reduce overall government cyber risk. MS-ISAC membership includes chief information security officers (CISOs) and equivalent roles within all 50 states, five U.S. territories, the District of Columbia, over 250 individual state departments, as well as thousands of local governments and tribal nations.

About CIS

The [Center for Internet Security Inc. \(CIS\)](#) makes the connected world a safer place for people, businesses, and governments through our core competencies of collaboration and innovation. We are a community-driven nonprofit, responsible for the CIS Controls® and CIS Benchmarks™, globally recognized best practices for securing IT systems and data. We lead a global community of IT professionals to continuously refine these standards to proactively safeguard against emerging threats. Our CIS Hardened Images® provide secure, on-demand, scalable computing environments in the cloud. CIS is home to the [Multi-State Information Sharing and Analysis Center® \(MS-ISAC®\)](#), the trusted resource for cyber threat prevention, protection, response, and recovery for U.S. state, local, tribal, and territorial (SLTT) government entities, and the Elections Infrastructure Information Sharing and Analysis Center® (EI-ISAC®), which supports the cybersecurity needs of U.S. elections offices.
