Local Peer Group

The MS-ISAC measured the areas of highest and lowest cybersecurity maturity, as reported from the 2020 Nationwide Cybersecurity Review (NCSR) assessment. This resource is based on the data from the 2020 NCSR, which was open for data collection between 10/1/2020 and 2/28/2021. It is our aim to call attention to these areas of interest, and most importantly, to call attention to resources, guidance, and services that may serve to increase the maturity of those lowest-scoring areas. This document is based on aggregated data from all organizations in this peer group and may not illustrate one specific organization's particular areas of lowest maturity. We recommend an individual organization use this guidance in the following steps:

- 1 Determine your lowest-scoring NIST Cybersecurity Framework (CSF) categories based on your NCSR scores.
- 2 Leverage this document to determine if your lowest areas align with those of your peer group reported below, or if you scored relatively low on the 7-point NCSR maturity scale in other areas.
- 3 Leverage resources and guidance listed below for those lowest-scoring areas that may need improvement in your organization.
- 4 Consult the Cybersecurity Resources Guide to see what no-cost courses are available. This includes professional development on the DHS FedVTE training platform that is accessible to SLTT organizations.

2020 LOCAL PEER GROUP

Highest Maturity Level NIST CSF Categories	Lowest Maturity Level NIST CSF Categories
Protect: Identity Management and Access Control	Identify: Supply Chain Risk Management
Protect: Awareness and Training	Identify: Risk Management Strategy
Detect: Security Continuous Monitoring	Recover: Communications
Respond: Mitigation	Recover: Improvements
Protect: Data Security	Respond: Improvements

For additional information on this Snapshot or the NCSR overall, please contact: NCSR@cisecurity.org.

The following resources are available to assist with the lower-scoring categories of the Local Peer Group overall:

Identify: Supply Chain Risk Management

MS-ISAC Developed Policy Templates:

- [Identification and Authentication Policy](#)
- [Security Assessment and Authorization Policy](#)
- [System and Services Acquisition Policy](#)

CIS Developed Guides:

While these guides are focused on the elections community, their principles can be applied within any organization.

- [CIS Technology Procurement Guide](#)
- [Managing Cybersecurity Supply Chain Risks in Election Technology: A Guide for Election Technology Providers](#)

MS-ISAC and Metrics Workgroup Developed Guide:

- [Supply Chain Cybersecurity Resources Guide](#)

Federal Guidance:

- [DHS CISA Supply Chain Risk Management Guidance](#)
-

Identify: Risk Management Strategy

MS-ISAC Developed Policy Template:

- [Information Security Policy](#)

FedVTE Courses:

- The Election Official as IT Manager; Cyber Risk Management for Managers; ISACA Certified Information Security Manager (CISM) Prep; (ISC)2 (TM) CAP Certification Prep Self Study 2014; Cybersecurity Overview for Managers; CompTIA Advanced Security Practitioner; (ISC)2 (TM) CISSP (R) Certification Prep 2018; (ISC)2 (TM) CISSP Concentration: ISSEP Prep; (ISC)2 (TM) CISSP: ISSMP Prep 2018
-

Recover: Communications Recover: Improvements

MS-ISAC Developed Policy Templates:

- [Computer Security Threat Response Policy](#)
- [Contingency Planning Policy](#)
- [Cyber Incident Response Standard](#)
- [Incident Response Policy](#)

Data Backup Tools & Resources (descriptions courtesy of the CIS “Microsoft Windows 10 Cyber Hygiene Guide”):

- [Microsoft Backup and Restore](#): A backup utility tool installed on Microsoft operating systems.
- [EaseUS](#): This free program can be configured to take system images.
- [Amanda Network Backup](#): Free, open source backup tool.
- [Bacula](#): Open source network backup and recovery solution.
- [Carnegie Mellon](#): The university makes their [Incident Response Plan](#) available, that can be used as a resource for others.
- [State of Oregon](#): The Oregon State Government provides a template for an [Incident Response Plan](#).

Additional Information

[Nationwide Cybersecurity Review \(NCSR\) Webpage:](#)

Information on the no-cost annual self-assessment from the MS-ISAC, as well as associated resources, is available on this page.

[Full CIS “Microsoft Windows 10 Cyber Hygiene Guide”:](#)

A number of the listed resources are included within this guide, courtesy of the CIS Controls team.

[CIS SecureSuite Membership:](#)

All state, local, tribal, and territorial organizations can access CIS SecureSuite membership at no cost. This includes the CIS Controls, the CIS Benchmarks, and CIS-CAT Pro Assessor for an automated comparison of your configurations against CIS secure configuration Benchmarks. The CIS Controls provide security best practices along with guidance on how to prioritize the controls, known as the CIS Implementation Groups (IGs). The CIS Benchmarks were created from the global community of cybersecurity experts and have more than 100 configuration guidelines to safeguard systems against today’s evolving cyber threats. The CIS-CAT Pro combines the security guidance of the CIS Controls and CIS Benchmarks into a single assessment tool.
