

3 Steps

to Secure Your Elections
Infrastructure Today

1 **Join the EI-ISAC**

- Get threat information, timely news, security alerts, and access to a host of other free services

2 **Assess your security posture and implement best practices**

- Assess and understand the gaps in your security using the free [Election Infrastructure Assessment Tool \(EIAT\)](#) and continuously monitor for vulnerabilities with DHS' Cyber Hygiene service by contacting nccicustomerservice@hq.dhs.gov
- Fill any gaps by implementing high priority best practices from the [CIS Elections Handbook](#)

3 **Develop contingency plans and exercise scenarios regularly**

- Know how to respond with the EI-ISAC [Cyber Incident Checklist](#) and the DHS [Incident Handling Overview](#)
- Plan for incident communications using a template like that from the [Belfer Center](#)

Many resources exist to help you meet your cybersecurity-related needs. For more, check out [DHS resources](#) and [EI-ISAC resources](#)
